Fariz Putra Hanggara

LinkedIn | +62 812-1033-1898 | farizputrahanggara@gmail.com | GitHub

Software Engineer focused on backend development and system integration, with hands-on experience building Go and Python services, REST APIs, and high-volume messaging systems. Experienced with Docker, RabbitMQ, MongoDB, PostgreSQL, production deployment, distributed-system troubleshooting, and performance optimization.

Education

Institut Teknologi Bandung (ITB) — **Bandung, Indonesia**
Bachelor of Science in Information Systems and Technology — *Aug 2021 - Aug 2025*

Professional Experience

Junior Software Engineer, Jatis Mobile — **Jakarta, Indonesia**
Dec 2025 - Present

- Developed and maintained backend services for high-volume messaging and enterprise platforms, covering **message scheduling, file ingestion, message processing and delivery, API gateways, chatbots, and AI-powered HR services**, supporting workloads of **100,000+ messages per batch.**
- Improved benchmark messaging throughput from approximately 1**00 TPS to 1,100+ TPS** through query batching, database indexing, MongoDB BulkWrite operations, and worker concurrency optimization.
- Integrated and troubleshot distributed backend services connected to **internal core systems, messaging providers, and third-party API**s, resolving application, database, queue, and message-delivery issues through root-cause analysis.
- Managed deployments across **local, staging, and production environments**, including Linux VM access via SSH, repository updates, environment configuration, Docker Compose builds, log monitoring, backups, and production incident handling.

Backend Engineer Intern, Sinergi Merah Putih — **Jakarta, Indonesia**
Developed and monitored on multiple projects — *May 2025 - Oct 2025*

- Developed a **Flask backend for a Pepper Robot** used in live stage performances, implementing movement-control APIs, face recognition, and **Gemini AI via Vertex AI** for interactive experiences.
- Monitored and maintained **Google Cloud** infrastructure through Cloud Console and SSH, troubleshooting CPU spikes, restarting services, and automating recovery of unsent data to maintain service availability.
- Rebuilt an internal administration dashboard in **Go** and integrated **APISIX log monitoring**, improving service observability and troubleshooting workflows.

Frontend Engineer Intern, Damaresa Group — **Bandung, Indonesia**
Worked on responsive web application development — *Sep 2024 - Feb 2025*

- Developed responsive **Flutter applications backed by Firebase**, implementing reusable interfaces and real-time data synchronization across application features.
- Improved application load times by approximately **40%** through performance profiling, bottleneck analysis, and caching optimization.

Digital Transformation Intern, Krakatau IT — **Cilegon, Indonesia**
Worked on enterprise process automation project — *Jun 2024 - Aug 2024*

- Developed a mobile procurement system to digitize paper-based workflows, reducing processing time from approximately **1 day to under 3 hours.**
- Built a **Flask backend** for procurement workflows, including automated PDF generation and document retrieval for reporting and operational processes.

Selected Projects

Disaster Risk Management — **Sep 2025**

- Developed an end-to-end earthquake risk analysis platform for **building detection, typology classification, and damage severity estimation**.
- Built a **FastAPI inference microservice**, containerized with **Docker** and deployed behind **Nginx** on a remote Linux server.
- Managed model training, backend deployment, and service maintenance through **Linux and SSH-based** workflows.

Damaresa Property — **Jan 2025**

- Developed features for a **Flutter hotel booking application** integrated with Firebase and released on the App Store and Google Play.
- Implemented real-time data synchronization and responsive user interfaces to support booking and property-management workflows.

Skills

- **Programming:** Go, Python, JavaScript, TypeScript, Java, SQL
- **Frameworks:** FastAPI, Flask, Node.js, React.js, Next.js, REST APIs
- **Data:** PostgreSQL, MySQL, MongoDB, Redis, Firebase
- **Infrastructure & Tools:** Docker, RabbitMQ, Nginx, APISIX, Linux, Git, SonarQube, GCP, AWS
- **Spoken Languages:** English (Professional Proficiency), Bahasa Indonesia (Native)

Certifications & Training

- **AWS Skill Builder** - Serverless CI/CD, DevOps, Containers — **August 2025**
- **Google Cloud Skills Boost** - Cloud Fundamentals, Core Infrastructure — **August 2025**
- **Cisco CyberOps Associate** - CyberOps Associate, Cybersecurity Essentials — **May 2024**
